

1

Y-T NOZZLE

Dusts In two opposite directions at a time.

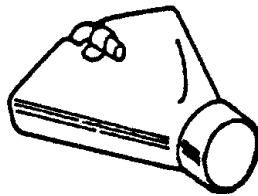

2

GRANULE-SPREADING NOZZLE

Spreads granular chemicals evenly without damage to granules.

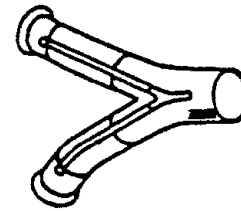

3

FAN-HEAD NOZZLE

Used for wide-angle spraying of liquid chemicals.

4

Y-HEAD NOZZLE

Sprays fine mist of liquid chemicals two rows at a time.

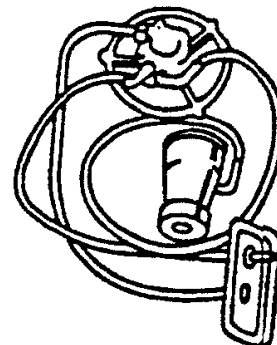

5

DUSTING HOSE

Available In 20, 30 & 40 Meters in length, for wide-range dusting.

6

LIQUID PUMP

A volute pump to keep liquid chemicals flowing continuously in one direction - from tank to nozzle tip. Indispensable for high mist-spraying, where nozzle tip is held above tank liquid level. Assisted with it, DM-9 can send a spray of fine droplets up to 10 meters high.
